

## SQL Problems :

1. problem occurred while importing excel file (in table format) to MY SQL server. And imported files are not able to edit any data.
2. While we edit the data in SQL server manually, and further not imported data from excel.
3. If I update EER diagram in MySQL, then the database can't accept any update.
4. How to convert not null into null in all tables at once a time.

5. How to Generate automatic I'D when we add the new data.
6. How to add multiple data (address/ Zip Code/ Area Code) of particular one company in MY SQL data base (Trouble in Table Formation and I'D creation.)

**Note: every plant has different locations and phone no. so how we create a table in MYSQL**
